```
Start → x
        ↓
        y
        ↓
   Which number is bigger?
```

Start → x → y → Which number is bigger?

Yes → X > y

No → y >= x

X > y → Stop

y >= x → Stop

Smaran Kootagal   6/30/2023

I started with the fixed number x. Then I took the input of the number y. Then I made a decisions as to whether x was bigger than y or whether y was bigger than or equal to x. I made a yes branch that was for x is greater than y. I also made a no branch that was for y is greater than or equal to x. Then I ended the chart.
